Art Unit: 1711

All previous rejections are hereby withdrawn.

The terminal disclaimer filed on 6-1-05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patents 6,726,860, 6,358,443, 6,153,129, 5,922,253 has been reviewed and is accepted. The terminal disclaimer has been recorded.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,455,074. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims recite a process broadly encompassing the application process and with re to the specific process limitations in application claims, these are disclosed by 08/443,726, incorporated by reference in the '074 patent at column 8, lines 58-65 and as the broad steps of removing phases and freezing embrace the specific steps of the '726 application, the patent claims include the specifics of the '726 application.

The closest prior art is Gombotz (US 5,019, 400, similar to Gombotz 6,569,458). However Gombotz does not teach or fairly suggest the presence of separate freezing and extraction sections (or vessels) in which the non-solvent is maintained in the liquid state throughout the process.
